### REASONS FOR ALLOWANCE

2. Claims 1, 3-17 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Claims 1, 3-17 are allowable over the prior art of record for the reason as stated in the Applicant's Remark dated on 2/4/2008 pages 8-9 and the reasons as below:

Regarding to claim 1, none of the prior art of record teaches or suggests a dedicated short-range communication on-vehicle apparatus mounted on a motor vehicle in a dedicated short-range communication system for an intelligent traffic system, comprising: a box-like housing for housing therein an antenna, a radio module and a data processing unit in a unitary structure; wherein said box-like housing is adapted to be fixedly attached onto a windshield of the motor vehicle with a mounting plate being disposed on the radiation side of said antenna by means of an adhesive member; and wherein at least a radio wave aperture portion of said mounting plate is made of a radio

wave transmission material, said dedicated short-range communication on-vehicle apparatus further comprising: a substrate on which at least one of said radio module and said data processing unit is mounted, wherein when said antenna is so set as to be transmissible in a direction orthogonal to said substrate, a substrate surface region located above an antenna transmissive planar region is greater than a substrate surface region located beneath said antenna transmissive planar region. It would not have been obvious for a person skilled in the art to combine other prior arts of record in order to arrive at the claimed invention.

Regarding to claim 3, none of the prior art of record teaches or suggests a dedicated short-range communication on-vehicle apparatus mounted on a motor vehicle in a dedicated short-range communication system for an intelligent traffic system, comprising: a box-like housing for housing therein an antenna, a radio module and a data processing unit in a unitary structure; wherein said box-like housing is adapted to be fixedly attached onto a windshield of the motor vehicle with a mounting plate being disposed on the radiation side of said antenna by means of an adhesive member; and wherein at

least a radio wave aperture portion of said mounting plate is made of a radio wave transmission material, wherein said antenna, said radio module and said data processing unit are mounted on one and the same substrate, and wherein the area of a substrate surface region located above said antenna is selected greater than a substrate surface region located below said antenna. It would not have been obvious for a person skilled in the art to combine other prior arts of record in order to arrive at the claimed invention.

Regarding to claim 12, none of the prior art of record teaches or suggests a dedicated short-range communication on-vehicle apparatus mounted on a motor vehicle in a dedicated short-range communication system for an intelligent traffic system, comprising: a box-like housing for housing therein an antenna, a radio module and a data processing unit in a unitary structure; wherein said box-like housing is adapted to be fixedly attached onto a windshield of the motor vehicle with a mounting plate being disposed on the radiation side of said antenna by means of an adhesive member; and wherein at least a radio wave aperture portion of said mounting plate is made of a radio wave transmission material, said dedicated short-range communication on-

vehicle apparatus further comprising: a label carrying predetermined information and designed to be stuck on said mounting plate; and a seal stuck on said mounting plate so as to cover said label. It would not have been obvious for a person skilled in the art to combine other prior arts of record in order to arrive at the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
